Summary

Lifetime-learner.

I'm learning programming by self-taught. So far I have HTML, CSS, Javascript under my belt for frontend development. I've started learning some serverside languages such as NodeJS, PHP, and Golang for backend development.

I'm still enthusiastically grabbing into any other programming languages, frameworks, or principles I can integrate into the coding apps into my head. I'm able to meet deadlines and high adaptability to changing priorities as evidenced by my experience in pursuing the world of programming as a professional developer.

My educational background gives me excellent analytics, problem-solving, managing resources, communication, and interpersonal skills with the ability to interact with individuals and work as part of a team.

Experience

Software Engineer

KOMPAS GRAMEDIA

Jul 2020 - Present (8 months +)

- Developing User Interface of Website based on given UI/UX design.
